

Dates of Iron Age Coins in Britain: Some Context

Last updated 20-Mar-21

By Ian Leins, Molly Masterson & Courtney Nimura

Dating Iron Age coins is not straightforward, and there are differing opinions on the dates of the coin types included in *Ancient British Coins* (ABC; Cottam *et al.* 2010). For the Iron Age Coins in Britain (IACB) website, we use the published dates from ABC with amended dates provided by Ian Leins' PhD thesis (2012a) for the Northeastern and Western series, which draws on detailed studies of the Hallaton and Pershore hoards (see Leins 2007; 2012b; Hurst & Leins 2013). We have created a series of tables in this document which aim to provide context for the dates, so users of the IACB website can learn more through other published works. These include the seminal works of Colin Haselgrove (1987; 1993; 1999), which also formed the basis of Leins' thesis dates, and John Talbot (2017), whose exceptionally detailed study of the East Anglian series uses a different approach to typology.

Table 1. The date phases published in ABC (Cottam *et al.* 2010, 7)

The dates assigned in ABC are not numerical, so IACB assigned numerical start and end dates that could be databased. To be inclusive, for 'early', we used the first 50 years of a century; for 'late' we used the last 50 years of a century.

ABC Phase	ABC Date	IACB- assigned Numerical Start Date	IACB- assigned Numerical End Date
1*	early-mid 2nd c BC	-200	-151
2	late 2nd c BC	-150	-101

*The IACB currently does not include the Continental coin series which comprise ABC Types 1–115.

Table 2. The regional date phases published in Leins (2012)

The explanation of how this schema was created, and how the ABC types were assigned to it, is given in Leins (2012a, 307ff). As Leins was concerned *only* with coin types with recorded findspots, many ABC types were not included. For the Eastern, Kent, Southern, and Southwestern series the schema draws heavily on Haselgrove (1987; 1993; 1999) and, for the East Anglian series, on Talbot (2017). These dates *were not used* for the IACB website, *except for* the Northeastern (NE) and Western (WE) series (highlighted below in green and also in Table 3. NB: This includes 2 types that ABC grouped in East Wiltshire, which Leins grouped with Western). *These date phases do not appear in Table 3 (see ABC Region: East Anglia section for further details).

Table 3. ABC dates compared with other sources

This table has nine columns which show alternative dates to those published in ABC. For two regions, Northeastern and Western, IACB uses dates from Leins (2007; 2012a; 2012b) and Hurst & Leins (2013). This table is not exhaustive – other dating schemas have been published, but they are not included here.

1. The ABC Type
2. The IACB-assigned numerical start date. Where the date had an indeterminate start (e.g. 30/20 BC), the most inclusive date was used (e.g. 30 BC).
3. The IACB-assigned numerical end date. Where the date had an indeterminate end (e.g. 30/20 BC), the most inclusive date was used (e.g. 20 BC).
4. The original date phase assigned to the type in ABC
5. The original date description/range assigned to the ABC phase
6. An alternative start date (highlighted in green, where used instead of ABC dating in IACB)
7. An alternative end date (highlighted in green, where used instead of ABC dating in IACB)
8. An alternative phase (highlighted in green, where used instead of ABC dating in IACB)
9. The reference(s) for the alternative dates (see full Reference list at end of document)

ABC Region: East Anglia								
The main source for the East Anglian series is John Talbot's (2017) book. Ian Leins (2012a) assigned East Anglian coins to his 'EA' phases according to Talbot's classification system <i>and not by ABC type</i> . As a result Leins' phases cannot be easily assigned to most East Anglian ABC types.

ABC Region: Northeastern								
The IACB uses Leins' dates for this regional coinage. The phases and dating scheme are based on Leins (2012a, 213; 307ff). In turn, this is derived from analysis of the Hallaton hoards (Leins 2007; 2012b).

ABC Region: Western								
The IACB uses Leins' dates for this regional coinage. The phases and dating scheme are based on Leins (2012a, 155; 307ff). In turn, this is derived from analysis of the Pershore hoards (Hurst & Leins 2013).

ABC Region: East Wiltshire								
This region was created in ABC, however other typologies attribute these types to different coin production groups. However, IACB has kept the ABC dates for this regional group. *For two types (2137, 2140) IACB uses the WE dates from Leins (2012a).
